- ALWAYS WEAR A LIFE JACKET (PFD) WHILE BOATING! Each boater must have a life vest which fits properly, is in good shape, and is accessible in an emergency. In Pennsylvania, children less than 12 yrs. old **must wear** a life jacket in a canoe, kayak or boat less than 20 ft. long.
- YOUR LIFE JACKET CAN'T SAVE YOU IF YOU DON'T HAVE IT ON! Tie your spare gear into your canoe but *wear* your life vest. *Don't* tie your lifejacket (PFD) into the canoe.
- *Never stand in a canoe. Kneel* in the canoe when going through rapids.
- Wear shoes to protect your feet from sharp stones and from glass.
- Protect yourself from the sun: wear sun screen, a hat, light clothing, sunglasses.
- DRINKING AND BOATING DON'T MIX! Alcoholic beverages are not permitted in the area between Depue Island on the north and Depew Island on the south. This includes: Smithfield Beach PA, Hialeah Picnic Area PA, Worthington State Forest NJ and its campground, and Tocks and Labar Islands NJ.
- DRINKING AND SWIMMING DON'T MIX! *DON'T DRINK-THEN-SWIM.*
- The river has sharp drop-offs and strong currents. Do not try to swim or wade across the river.
- *NEVER SWIM ALONE!*
- Plan to be off the river before dark.
- Bring enough water. Don't drink river water unless it is boiled at least 3 minutes.

River Distances

Canoeists average about 2 miles an hour, but their speed can vary greatly with river level, wind, current, and paddling skill.

If you capsize DON'T PANIC!

- **Stay with your capsized canoe!** Even a swamped canoe can support you.
- **Keep on the upstream side** of the canoe to avoid being pinned against a rock or obstacle.
- **If you lose your canoe, float on your back, feet first and pointed downstream.**
- **Don't stand up in rapids.** Your feet and legs can get trapped; the current can pull you under.
- **Save people first!** Retrieve equipment only if it can be done safely.
